

Hello sir, there are 3 website's links from 3 different countries that I have logged in by site no redirect rule. In this process I have used admin page finder tool. Links and screenshots are given bellow:

- 1) Brazilian website : <https://www.bancariosmogi.com.br/2011/admin/login.php?>

2) Thailand website : <http://tms.happydelivery.co.th/tms/admin/user/login.php>

The screenshot shows the TMS SYSTEM admin interface. The left sidebar contains navigation links: Log out, เปลี่ยนรหัสผ่าน, เปลี่ยน DC, เปลี่ยน Sub DC, Generate QR-Code, Admin Page, Dashboard, Monitor นิคมสง, Monitor โบราณการ, ข้อมูลระบบ, and ทะเบียน. The main content area displays a table of Diesel prices. The table has two columns: 'วันที่' (Date) and ' Diesel'. The data rows are as follows:

วันที่	Diesel
03/08/2568	31.94
02/08/2568	31.94
01/08/2568	31.94
31/07/2568	31.94
30/07/2568	31.94

Below the table, there is a section titled 'ประกาศจากบริษัท' (Company Announcement) with the text: 'ประกาศวันหยุด วันจันทร์ที่ 28 ก.ค 68 วันเฉลิมพระชนมพรรษาพระบาทสมเด็จพระเจ้าอยู่หัว'.

3) Pakistani website : <https://kfgc.edu.pk/admin/index.php>

The screenshot shows the KFGC.edu.pk admin interface. The top bar displays 'Login As: Admin' and the time '03:16:16 pm'. The main content area is titled '+ Add News' and contains a form with the following fields:

- Title : * Title length less then 55 (with a text input field labeled 'Type Title')
- Notification Detail* (with a text area)

A 'Show News' button is located in the top right corner of the form area. A message at the top of the form states: 'Fields with * are required.'

The End
